Mitsubishi Electric is in the process of building a network of large LED screens in main cities throughout Germany. Having successfully installed systems in Cologne and Hamburg, Mitsubishi Electric has now installed four LED screens at the landmark **Rathaus Galerie** retail and leisure destination in Essen.

The Rathaus Galerie is located in the heart of Essen's city centre. Covering 31,000 m², it is home to 60 shops and a wide range of food outlets and restaurants. A total of four Mitsubishi Electric LED screens have now been installed in this .

Covering 10.65 m² each, two LED screens are placed in an eye-catching position in the ground floor retail area of the Rathaus Galerie, greeting visitors as they enter.

Each screen consists of four **AVL-ODT10** LED modules, measuring 4.16 m wide and 2.56 m high. 416 x 256 pixel resolution at 10mm.

Two further LED screens are installed outside, each of 19.7 m² (5.12 m wide x 3.84 high) The 10mm AVL-ODQ10 screens deliver a resolution of 512 x 384 pixels and a 5000 cd/m light output, making them visible to passing motorists approaching from the north and south using the four-lane Schützenbahn that passes beneath Rathaus Galerie.
