Korbyt is on the GO again with another software update. Fast on the heels of their January 1.2 release, **Korbyt 1.2.5** introduces a host of new features and enhancements for the digital signage and mobile extensions of Korbyt.

The latest release packs in many UI/UX enhancements, features to meet customer requirements and strategic features that provide innovation to the platform.

The 1.2.5 update introduces these new features for the mobile extension of the platform, **KorbytGO**

- A new Gamification feature set for KorbytGO lets administrators increase employee adoption and engagement with the mobile app.
- Making KorbytGO even more scalable for administrators, a new feature lets you add new bulk user provisioning features.
- Push Content to Digital Signage: the new feature allows administrators to utilize a KorbytGO

What's New in Korbyt 1.2.5 Update?

- Korbyt's Layout Interactive Button Element improves usability by now allowing content authors to select from the new **Quick Actions** menu to designate interactive actions and destinations.

This requires no coding and makes the interactive creation experience faster and easier for all levels of Korbyt users.

- The new Media Library feature **allows content to automatically expire** in Playlists, making content publishing for large networks quicker and easier.
