The kiosk software "FrontFace for Touch Kiosks" by **mirabyte** helps users to create professional multimedia touch screen applications and presentation systems for use in museums and exhibitions.

mirabyte software is what is known in IT parlance as an ISV (Independent Software Vendor) that specializes in digital signage and kiosk software. Its standard software **FrontFace for Touch Kiosks** offers a software solution that allows users to easily create multimedia experiences.

The software is designed to enable users without any programming knowledge to create attractive touch screen interfaces and menus for visitor use with minimal effort. Virtually anything can be used as content without further adaptation, from videos, photos and images to PDF files and even websites. FrontFace's unique Print2Screen function even allows users to take over content from any Windows application that supports printing with just one click.

FrontFace also offers maximum flexibility with regards to hardware since the software can be run on every Windows-operated system and supports any screen resolution as well as nearly all touch screen hardware (including tablets). FrontFace automatically protects the underlying Windows OS against manipulation and damage with the integrated **FrontFace Lockdown Tool** .

FrontFace also offers a solid basis for complex applications and installations: Additional functions such as plug-ins can be added easily. Available plug-ins such as a quiz module or a live TV interface, plug-ins can also be developed individually. Furthermore, external systems such as lighting control, audio systems and even sensors can be integrated without difficulty; this way, models and exhibits can be incorporated to create a self-contained world of experience.

Thanks to multi-screen support, even external flat screens and projectors can easily be integrated, allowing the realization of comfortable multimedia presentation systems, also for larger visitor groups.

"FrontFace for Touch Kiosks" is available for download as a fully functional trial version on the mirabyte Website free of charge. The full version can be purchased at a cost of EUR 499.95 (plus VAT) as a permanent license with temporally unlimited use and no recurring costs. This price also includes free updates and support for one year.
