Professional display and digital signage maker AG Neovo focuses on "Out-of-the-box Signage and Collaboration Display Solutions" at ISE 2020, with a showcase of display technology aimed at collaborative meetings and smart signage management.

The company highlights the Meetboard, a plug-and-play meeting and collaboration solution. Available in 65-, 75- and 85-inch sizes, the Meetboard promises quick starting meetings thanks to intuitive software (Meetboard App) and interactive apps (WPS Office and ScreenShare Pro). Meeting participants can share files via email, QR code or cloud drive, and the solution ships complete with video conferencing capability.

Also on show from AG Neovo is the range of cloud-enabled Neovo Signage displays. The NSD-Series 4K displays incorporate Neovo Signage, a cloud-based content management system (CMS) offering remote signage content and device management solutions, as well as smart publication and interactive displays.
