ViewSonic announces its PJD6 Series DLP projector line (PJD6223, PJD6253 and PJD6553w) which is Crestron- and AMX-enabled-- and specifically designed for classroom and corporate environments.

ViewSonic's **PJD6 Series** projectors come equipped with Crestron RoomView advanced network management software that enables centralized control for up to 250 projectors. With Crestron RoomView, users have an advanced, real-time alert system that sends status updates regarding power, lamp life and unit presence to simplify maintenance efforts.

With ViewSonic's Smart ECO technology, PJD6 Series users present their content with the appropriate lighting, dimming the image as needed, while enjoying an automatic energy savings of up to 70%.

PJD6 Series' ECO mode delivers a longer lamp life of up to 6000 hours for greater energy and cost savings, along with noise reduction. When it comes to lamp maintenance, the PJD6 Series' top slide door design makes the task easier than ever.

The 120Hz/3D-ready PJD6 Series is packed with useful features, such as versatile connectivity

options, including HDMI and multiple PC and video inputs, a Dynamic Movie mode for image contrast, Digital Keystone Correction and a 10-watt integrated speaker.

Teamed with 3500 lumens (2700 lumens on the PJD6223) and BrilliantColor™ technology, these projectors maintain a low total cost of ownership.

“Customized for teachers, professional trainers and consultants, the new PJD6 DLP projector Series offers many exclusive and valuable functions. This includes real-time monitoring and remote management for up to 250 networked projectors, along with versatile connectivity options,” says Trevor Holt, ViewSonic’s European Product Manager for Projectors. “... We are also very pleased to be a partner of AMX InConcert Program. It demonstrates ViewSonic’s commitment to the education and enterprise markets as going forward, all our new projectors will be certified with AMX.”

The PJD6223 and PJD6253 are both advanced, networkable XGA 1024x768 projectors, suitable for any lighting environment. For a widescreen format projector, the PJD6553w has a WXGA 1280x800 native resolution, and is ideal for 720p HD viewing in the classroom, living room or boardroom. LAN connectivity also enables remote network management for easy device management.

The ViewSonic PJD6223, PJD6253 and PJD6553w are available with a 3-year European warranty.
