Shown in USA at InfoComm, Epson's new **PowerLite 4000-Series** includes three new projectors specified for large venue applications.

The PowerLite 4650, 4750W and 4855WU projectors claim 5,200, 4,200 and 4,000 lumens and offer XGA (1024?768), WXGA (1366?768) and WUXGA (1920?1200) resolutions, respectively.

Integrated with Faroudja DCDi video processing, a centered lens design and up to two times optical zoom with lens shift, all three projectors have analog (VGA) and digital (HDMI) video ports, as well as a Display Port input.

All three of these projectors have DICOM Simulation Mode for specialized imaging uses standardized grayscale to reproduce medical images, such as x-rays, for medical training and education.
