It's summertime so our thinking is no deeper than the swimming pool. The **Acronn WindLED Rollable 12** is already at the pool.

It does have the advantage of complete water resistance for both front and back, making it suitable for both indoor and outdoor use.

Thanks to a 12.5mm pixel pitch, 15% transparency and quick rollout design, the Acronn WindLED Rollable 12 can be used to create imposing stage sets, on a small budget and with little installation time.

The SMD LEDs and the specific hardware on this IP65-rated unit provide high quality images you can swim by.
