

Sony updates 11 of its education and corporate projectors, building on its offering to the European market. The D-Series, E-Series and S-Series have been refreshed.

Sony's latest Interactive **Ultra Short Throw S Series** projectors incorporate new integration capabilities. Auto calibration, teaching features, video capture and video conferencing abilities provide the presenter with greater options to make their presentation more interactive.

In addition, all new released projectors across the ranges now have wireless communication capabilities with tablets and smartphones, via the **Pixelworks' VueMagic Mobile Presenter** application. VueMagic Mobile Presenter enables users to make presentations or share content using most mobile and tablet devices with iOS version 5.1.1 or Android (from October). Presentations can be run off tablet and smartphone devices of all sizes by teachers, students and other audiences.

Other features of the new D-Series, E-Series and S-Series projectors are similar to those announced in the line-ups last year. These include an auto lamp dimming function, which enables the projectors to intelligently detect if it is left on with a static signal being fed. The projectors also incorporate convenient eco-conscious features that cut energy consumption and extend lifetime, making them more productive and cost efficient. This includes an Auto Brightness Adjustment Function, where the brightness of the lamp's output is automatically adjusted depending on the brightness of the projected image.

The Picture Mute function also reduces power consumption to 30%, saving lamp hours and costs. There's also no need to completely power-off or turn back on which increases power consumption and can be time-consuming.

The new models in the **D-Series** are: VPL-DX126, VPL-DW126 and VPL-DW146. They are available from July with prices starting from 420 EUR.

The new models in the **E-Series** are: VPL-EX226, VPL-EW226, VPL-EX246, VPL-EW246, VPL-EX276 and VPL-EW276. They are available from July with prices starting from 455 EUR.

The new models in the **S-Series** are: VPL-SW526C and VPL-SW536C. They are available from August with prices starting from 1295 EUR (interactive UST version).
