

NCR Corporation purchases the assets of Netkey, a provider of kiosk and digital signage software apps used by in multi-industry self-service apps such as gift registry, guided selling, endless aisle and human resources functions.

Terms were not disclosed.

Netkey's enterprise software platform uses a scalable architecture to enable development of apps for kiosk and digital signage-based solutions.

NCR will combine Netkey's software platform with its own technologies to provide a best-in-class enterprise solution, which includes software apps, one of the broadest hardware portfolios in the industry, and a suite of services. NCR will continue to provide multi-vendor hardware support with the Netkey solution.

Netkey has over 75,000 kiosks and digital signs installed by more than 400 clients in the retail, finance, transportation, and government sectors. Many of these customers also use NCR's kiosk, self-checkout or POS solutions.
