

6th Annual NEC Solutions Showcase in London

Written by Bob Snyder
05. 05. 2014

Time for the 6th Annual **NEC Solutions Showcase** when NEC and partners present end-to-end solutions in real-life scenarios to educate as well as to inspire.

For 2014, more than 50 solutions partners will demonstrate more than 80 solutions within 9 vertical zones – tailored solutions which address the specific needs of users.

Held in London (The Velodrome, Lee Valley VeloPark, Queen Elizabeth Olympic Park, Stratford) on May 14-15, NEC Display Solutions gives a few examples of what this event can offer you:

- Use the way-finding kiosks for personalised directions - accept your NFC chip as you pass through registration.
- See the Showcase Showguide come to life using the NEC App, Bluetooth location detection and Augmented Reality.
- Context Aware signage delivers relevant and intelligent content. You'll find NEC's leafengine integrated solutions throughout Showcase.
- A 4K workflow sees content filmed live, edited, exported and displayed around the venue on a stunning interactive 36-screen 380? curved show-stopping videowall
- Discover NEC innovation with next generation display technology incorporating NFC, human sensors, frame delay compensation and auto configuration of videowalls
- Be the fastest to generate your VC call using pedal power and win an iPad!
- Get out on the track and follow in the cycle-tread of TeamGB's multiple Olympic medal
