Peerless-AV announce the EMEA availability of its **KIPICT555 All-in-One Kiosk powered by BrightSign** .

The kiosk will be shown for the first time outside the U.S. at **ISE 2018** . Featuring an elegant, design with slim frames and a small footprint, the All-in-One Kiosk comes fully-assembled for easy installation in hotels lobbies, restaurants, airports, stadiums, retail stores, museums and other indoor public spaces.

Incorporating a **55" commercial grade LCD display with 6 simultaneous points of IR touch interaction** , 9ms response time and 5000:1 contrast ratio, the kiosk is ideal for audience engagement.

Set up of the KIPICT555 is simple via microSD card, USB, wi-fi, Bluetooth or cable. Using the embedded BrightSign HS123 media player and **BrightAuthor software**, users can design and publish interactive content for a variety of uses, such as wayfinding, entertainment and digital merchandising. They can also update messaging and interact with the kiosk remotely via Ethernet, wi-fi or the BrightSign app.

Two integrated 6W speakers and a 3.5mm stereo jack allow for multiple audio options. Further features include Full HD 1080p60 single video decoding, HTML support, networked content playback, as well as more features including interactivity via the GPIO port, remote snapshot, live text, media feeds and multi-zone layout.

Access to the kiosk for servicing and maintenance is via the rear and a keyed alike cam lock on the hinged door prevents unwanted tampering. The kiosk is available in a smooth gloss black finish to suit every interior décor.
