

**Edbak** announces availability of its 2015 catalogue of industry mounting solutions.

“Integrators love the catalogue because it shows various available products and solutions,” says Justin Peyton, European Sales Manager. “In some cases, our catalogue actually stimulates ideas that the integrators need to solve their mounting problems. They come back from a client meeting and flip through the catalogue to find an appropriate solution to a specific problem.”

Since 1992, Edbak has been solving mounting problems. ISE 2015 was Edbak's 10th appearance at the show.

Edbak is a leading designer and maker of AV mounting display solutions and accessories: **their off-the-shelf range includes flat panel mounts, trolleys and stands, projector mounts, desktop and tablet mounts, kiosks and environmental enclosures.**

Customers have included the office of Poland's President as well as airports (such as Dublin and Warsaw), shopping malls (the famous **Blue City** in Warsaw), retail (including **Tesco**), transport (bus, railways and subways), stadiums (such as **C&C Stadium Poznan**

) and corporates (one good example is **Roche** ).

In addition, Edbak is specialized and experienced in **bespoke solutions** via a dedicated custom design service. Because of its location in central Europe, the company successfully competes in cost-effectiveness against Asian competitors.

“Edbak has introduced the latest automated machine technologies with traditional techniques in its ISO 9001 facilities, ensuring speed, flexibility and precision while retaining TUV certified product quality,” notes Peyton.
