X2O Media won two awards at the Digital Signage Expo (DSE) 2010 First Annual Awards Dinner.

In the Corporate & Government category, X2O won an Apex Award for the development of an innovative digital signage solution for **Unisys Belgium NV**.

In addition, X2O received a Content Award for its data-driven, interactive solution designed specifically for hotel and conference facilities.

The Apex award-winning deployment at Unisys Belgium was implemented by systems integrator **AVI-SPL**. Using X2O Media's Xpresenter digital signage platform, the Unisys implementation ranges from a screen greeting guests in the reception area to a state-of-the-art corporate showcase, as well as providing compelling visual content to meeting rooms, the boardroom, and beyond.

X2O Media's Content Award-winning solution was created in partnership with **PSAV Presentation Services**.

Their jointly delivered solution lets hotel guests and conference attendees learn about local attractions, flight information, and hotel services. The channel features a variety of content options including 3D interactive wayfinding, weather conditions, concierge services, conference schedules, and hotel promotions.
