They are calling it **"the new standard in analyzers."** The **Murideo Fresco SIX-A** is an 18GBPS 4K Analyzer that can read HDR data at the same time as giving you a live video preview. Paired with the **Fresco SIX-G Generator**, the set becomes a full calibration and testing system.

With the Murideo Fresco SIX-A Analyzer, you can test HDR signals, metadata, infoframes, and 2-channel and multi-channel audio confidence tests-- as well as read and write EDIDs with its Advanced EDID analysis and tools.

Murideo Fresco SIX-A: The Next Analyzer
